AMWC 2025: With R-ENERGY, Teoxane Showcases Its Expertise in Skin Quality

Teoxane announces its participation in **AMWC 2025**, taking place from March 27 to 29 in Monaco, at the Grimaldi Forum.

On this occasion, Teoxane will present **R-ENERGY**, its **multidimensional approach** dedicated to improving **skin quality**, through targeted injectable solutions and a specialized dermocosmetic routine.

Skin quality is a universal pursuit that evolves over time according to individual needs and aspirations. With **R-ENERGY**, the approach is both holistic and personalized: by naturally acting on the skin's biomechanisms and structure, the treatment **promotes hydration, radiance, and a natural glow**^{1,2,3}.

Whether the goal is to maintain the freshness of youthful skin or to restore vitality and luminosity to more mature skin, **R-ENERGY** reveals the glow of healthy skin at every stage of life.

Skin Quality at the Heart of Aesthetic Expectations

As more individuals adapt their lifestyles to preserve their health and energy⁴, the pursuit of solutions focused on vitality, well-being, and skin quality becomes essential. This evolution reflects **a preventive and holistic approach of beauty**, where skin quality is intrinsically linked to **overall well-being and self-confidence**.

94% of respondents express a desire to improve their skin's appearance for a more radiant complexion, positioning skin quality as a **major aesthetic concern**⁵.

This dynamic is observed among all age groups, with **72% of 18-28-year-olds and 29-40-year-olds** indicating that they are inclined to adopt a skincare routine. Notably, **63% of 18-28-year-olds** consider it important that the products they choose enhance the radiance and luminosity of their skin.⁴

R-ENERGY: A Holistic Approach to Skin Quality

With **R-ENERGY**, Teoxane introduces a strategy combining targeted injectable solutions and advanced dermocosmetic care. **R-ENERGY** is based on a deep understanding of skin needs

and the key parameters defining skin quality, such as **firmness, texture, radiance, and skin's tone evenness.**

While the epidermis is the first visible indicator of aging, multiple layers of the skin are involved in this process, each affecting our appearance⁶. **R-ENERGY** incorporates a protocol that **addresses the needs of different skin layers to reveal the skin's full potential**^{1,2}.

Teoxane pushes the boundaries of aesthetics with a **comprehensive approach that combines dermocosmetics* and injectables**** to reveal a radiant skin. A consistent **daily skincare routine** is essential in maintaining hydration and glow. As a periodic complement, the **R-ENERGY** approach **featuring Redensity 1*** alone or combined with RHA® 1******, stimulates the skin's biological mechanisms, **promoting cellular renewal and collagen production**⁷. Through this unique synergy, Teoxane offers **a complete and tailored solution** for visibly revitalized, more supple, and luminous skin.

- **Redensity 1:** A non-crosslinked hyaluronic acid injectable 'skin booster', enriched with vitamins and nutrients, specifically formulated to redensify and deeply hydrate the skin, helping to prevent signs of aging².
- **RHA® 1 :** A solution for correcting fine expression lines while providing deep hydration¹. **RHA® 1** has been shown to stimulate collagen production and increase the density of elastin fibers⁸.
 - **86.9% of patients treated with RHA® 1 rated their smile lines as “improved” or “significantly improved”, two months after initial treatment.**
- **Dermocosmetics :** An expert **anti-aging skincare line** inspired by aesthetic medicine, designed to prolong and optimize results at home. With **20 years of research into hyaluronic acid**, the brand incorporates **its exclusive RHA® technology**—similar to that found in its filler products—for targeted action. Clinically proven and endorsed by healthcare professionals, this routine delivers **high-performance daily skincare** combining hydration, protection, and correction.

Teoxane's MLT (Multi Layering Technique) 3.1 is integrated into the R-ENERGY protocol to offer comprehensive and precise skin management. By targeting **all three skin layers**, this methodology allows practitioners to respect the dynamics of facial movement and the complex anatomical structure of the face.^{1,2,9,10}

By strengthening the foundations of the skin and enabling tailored treatment plans, MLT 3.1 enhances skin quality while restoring volume, ensuring patients to obtain **tailored, dynamic, and natural aesthetic results**.^{8,9}

Symposium: “A Journey Through the Facial Layers – From Deep Volumisation to Skin Quality”

On **Thursday, March 27, from 2:00 p.m. to 4:00 p.m.** at the **Prince Pierre Auditorium**, an exclusive symposium moderated by Prof. Lee Walker (UK) will highlight Teoxane's expertise in skin quality treatment.

This symposium will explore the latest clinical advancements in volume and skin quality management, presenting case studies from Prof. Billur Sezgin-Kizilok (Turkey) and Dr. Raul Cetto (UK). A live demonstration will also be performed by Dr. Shady Ismail (Egypt).

An Immersive Booth Showcasing Skin Quality

Visitors will have the opportunity to engage with our experts at our booth (**Hall Ravel, Booth P2**), dedicated to skin quality solutions. In this era of digital tools supporting medical education, an interactive space will highlight the clinical benefits and performance of our solutions. Attendees will also be able to undergo a personalized skin diagnosis on site. Teoxane's dermocosmetic expertise will also be on display, including its full skin quality routine, featuring the new **Active Microscrub** - a dual-action exfoliating complex designed to smooth the skin and enhance its radiance and softness.

“This new edition of AMWC is a unique opportunity for Teoxane to showcase our expertise in Skin Quality and introduce R-ENERGY to healthcare professionals. It's a versatile, multidimensional approach that acts within the dermis and sub-dermis to deliver beautiful skin. Teoxane offers a holistic vision of skin care to meet patients' expectations for more authentic, personalized aesthetic outcomes that align with their quest for improved quality of life”. **Charlotte de Reals – Global Head of Marketing Excellence**

About AMWC

The Aesthetic & Anti-Aging Medicine World Congress (AMWC) is one of the world's largest events dedicated to aesthetic and anti-aging medicine. Held in Monaco, this benchmark event brings together international experts, practitioners, and industry leaders to showcase the latest scientific, technological, and clinical advancements. With a rich program of conferences, workshops, and live demonstrations, AMWC promotes innovation, learning, and exchange among aesthetic healthcare professionals.

About Teoxane

Founded by Valérie Taupin in 2003, Teoxane specializes in developing solutions using hyaluronic acid. With over 20 years of expertise, it is a pioneer in the science of facial beauty. The company was founded on a unique vision: to open the possibilities of aesthetic treatments using high-performance dermal fillers and dermocosmetics developed through in-depth scientific research. Through attentive listening, education and establishing the foundations for a safer industry, Teoxane has ushered in a new era in aesthetic medicine. Here, minor beauty procedures wield a significant impact on a patient's self-image and overall well-being.
